IT SOLUTIONS FOR A HASSLE FREE WORLD!

ABOUT US

WHO WE ARE

Chipin is a leading technology solutions and services company based in the UAE. We specialize in providing reliable and hassle free IT solutions across portfolio of technologies for Network Services, IT Support, Computer Hardware, Website Designing and Custom Software Development.

Our clientele includes companies from industries such as retail, construction, real estate, shipping, oil & gas, e-commerce, procurement, transportation, health care and so on. Over the years, we have grown to become a well known systems integrator with expertise in software, hardware and networking solutions.

With two offices in sharjah and plans for expansion, we strive to become the vendor of choice for all customers.

WHAT WE DO

We provide simplified IT solutions to complex business problems through our services in the following areas

- » IT Infrastructure implementation and maintenance
- » Website & Graphics Designing
- » Business Software Products & Custom Software Development

HOW WE MAKE A DIFFERENCE

Our experience and expertise in designing, developing, implementing and supporting business solutions enables our customers to streamline business operations, enhance efficiency and gain the required competitive edge. We believe in providing the highest quality of implementation enabling our customers with a high utilization factor of their IT solution. By combining our business know-how & technological expertise, we help our customers increase efficiency and simplify operations.

Honesty, hard work and dedication to the cause, is the hallmark of our approach. We aim to provide HASSLE FREE IT solutions, so our customers can focus on what they do best, their business.

NETWORK SERVICES

In the modern world, information is the key to success for any business. The information serves no purpose if not communicated in a fast, reliable and secure manner. This is where IT infrastructure plays a vital role. We, at Chipin, understand and address these business needs by providing the following services:

IT SUPPORT CONTRACTS

Our AgentNeWhere service is designed for customers who don't have an expert in-house IT Support function and who prefer to focus management energies elsewhere.

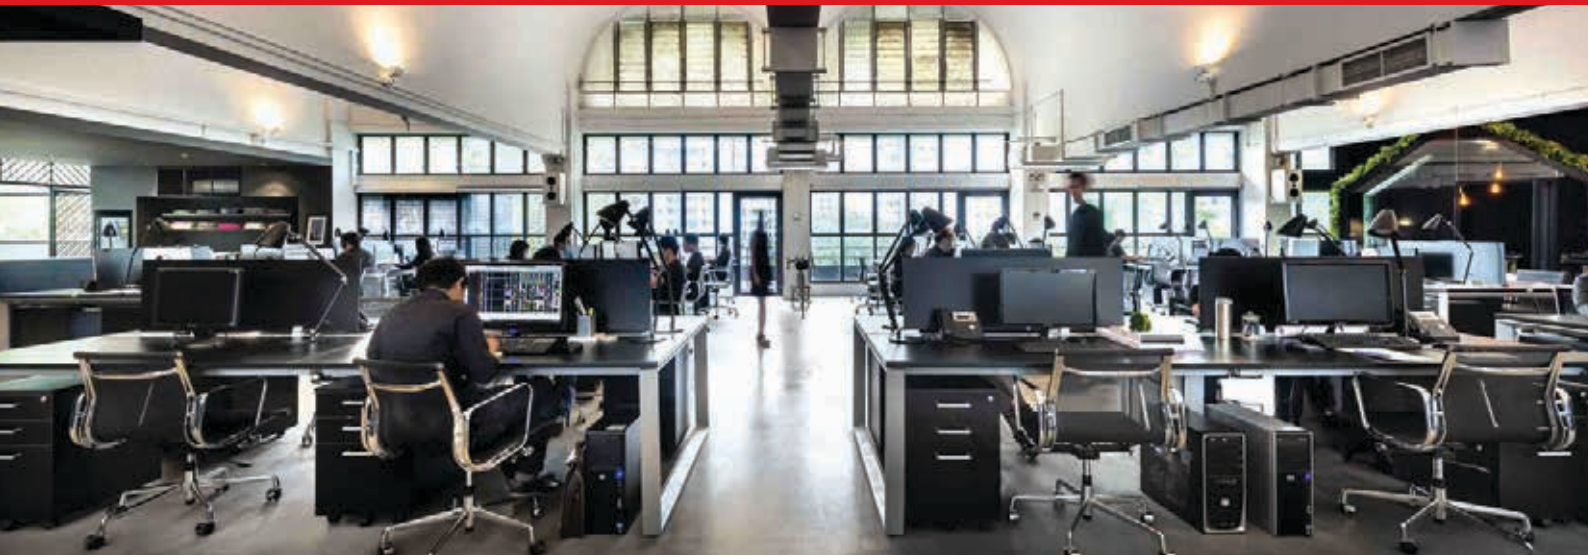

With this service, we take full responsibility of your overall IT requirements, managing day to day support and working as your IT Department. We also provide long term advice regarding IT making your IT Investments sound and delivering exceptional value.

With the AgentNeWhere Service our experienced team ensures daily monitoring of your IT Infrastructure, as well as implementing antivirus updates and addressing all other IT related issues. Our long established and highly regarded hardware maintenance service, delivers the guaranteed fix times that your users demand, minimizing downtime and protecting your IT investments.

OFFICE SETUP & MAINTENANCE SERVICE

Setting up a new office or moving from one office to another is a painstaking exercise. In absence of an IT Department, it becomes even more cumbersome to handle. We understand this problem and hence offer a unique service for setting up & managing your workplace. Whether it's a new office or you are shifting your office, we take charge of all IT related details required for your new office.

IT SOLUTIONS FOR A HASSLE FREE WORLD!

Some of the key services we offer in full office setup & maintenance:

Structured Cabling

POS Systems

Office 365 Setups

CCTV Systems

Time & Attendance Systems

Cloud Solutions

Telephony
(Avaya, Panasonic & NEC PABX Systems)

Networking of Active Components
(Switches, Routers & Firewalls etc.)

Server Setups (Active Directory,
Exchange, File Server, AV Servers etc.)

CREATIVE DESIGNING

Wonderful ideas are embedded in the "ordinary" and it is the ordinary that lays foundation for the extraordinary. With this belief the "ordinary" tools of our creative design team have started weaving magic.

We have brought together creative minds viz. web designers, creative writers, researchers, content developers and art directors with vast industry experience to form our creative design team. Few of the jobs undertaken by our team are:

WEBSITE DEVELOPMENT

One needs to have a strong internet presence to build a successful business in the modern times. We at Chipin can help you achieve this. Your customers should experience the uniqueness of your company when they visit your site. All the features of a good website, such as easy to find, quick to load, easy to navigate and unique in its own entity etc. should be evident on the first visit itself.

Our creative team analyses your business to understand your target audience and what should be shown on the website. Based on our industry experience we then propose you various designs and work closely with you to refine the concept. Unlike other companies, we strongly emphasize on the content of the website. Whether it be the images or text, our creative team evaluates all and recommends what should go on the website.

GRAPHIC DESIGNING

Graphic designing is a unique field in its own and requires a lot of creativity. We know what it takes to create a brand. To cater to all the creative requirements of the ever growing business sector, we offer customized professional visual design solutions for a broad range of printed & web marketing materials.

Experience from a vast array of creative disciplines including fine art, graphic design and typography as well as a high level of technical capability allows us to provide our customers with top quality designs. We plan, develop and deliver any size project from small business branding package, logos, business cards, brochures to comprehensive branding-identity packages for large establishments.

SEARCH ENGINE OPTIMIZATION

Search Engine Optimization or SEO is a methodology that is implemented across a website to achieve better search engine rankings for the site. Search Engine Optimization is a modern cost-effective marketing tool that ensures quality traffic to your website.

Search Engine Optimization involves thorough competitive analysis of your website which considers design analysis, structural analysis, content analysis, keyword analysis and analysis of competitors' websites. This is a detailed process which helps you understand where your website stands today and how to achieve better search rankings.

We, at Chipin, offer customized SEO Packages which allows our customers to select where and for how long do they wish to be on search engines.

SOFTWARE DEVELOPMENT

In today's world every business requires IT Softwares in order to streamline and smoothen operations. These softwares are heavily relied on for making mission critical business decisions.

The efficiency of a business can increase multi-fold if good business applications are in place. We fully understand this need and are constantly working towards devising hassle free IT software solutions to cater to our ever growing customer base. As of now we offer the following software solutions to help clients achieve their business goals.

KALL GAUGE

Kall Gauge is the first of its kind product, which defines and automates the processes involved in the processing of monthly telecom invoices. It streamlines the information flow to and from the end user and maintains full audit track of how the telecom facility extended to the employee is being used.

Does it take you forever to process your monthly telecom invoices? Are you unable to achieve efficient and accurate usage information despite putting in extra hours? We can help you increase the efficiency as well as the accuracy of your accounts/admin team and also help you contribute positively towards the environment by saving tonnes and tonnes of paper used for printing and distribution of telecom invoices.

QUICK CHEQUE

Erroneous entries with spelling mistakes, illegible writing that can't be understood, improper tracking of transactions are some of the most common issues that mark cheque creation. Manually writing cheques can be a tedious task yet they do not present a great image for any Individual or Business.

Our latest offering; Quick Cheque; is a professional Cheque Printing & Bank Book Management software that enables Businesses and Individuals to write & manage cheques in the easiest, most accurate and secure manner. Quick Cheque reduces spelling errors & writing mistakes and makes your cheques look professional while portraying a better impression of you & your company.

Quick Cheque presents an easy, secure, accurate and cost effective solution for cheque printing.

ENGAGEMENT DIARY

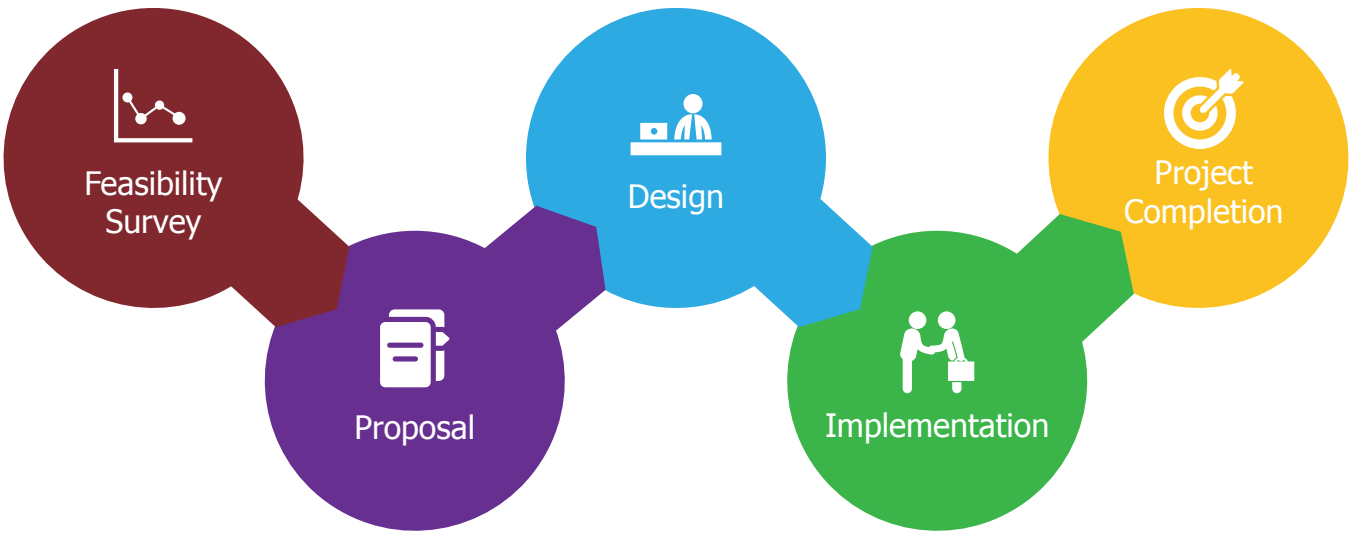

Messy appointment books and frustrating entries in writing that can't be understood, are not a great look for any professional business. In today's competitive world where time means money, it is important that you make optimum use of the available time & resources. Wouldn't it be so much easier if you could create an appointment in a jiffy or click on the client's name and move it to a new time? You should really spend less time booking appointments for your customers and more time focusing on your customers needs.

Engagement Diary, ED, is an application aimed at easing the business processes involved in Scheduling & Maintenance of Appointments in business outfits like Spa's, Fitness & Beauty Centres, Clinics, Hospitals, Consulting Firms etc. ED automates the processes involved in maintenance of appointments, making the information flow easy and accurate.
